

## THE TOP 10 JOBS FOR THE FUTURE

**Summary:** *Have you ever wondered which jobs will be popular in the future? Well, you have come to the right place because we have compiled a list of the top 10 jobs for the future.*

As the economy continues to recover, we have decided to take a look at what some of the best jobs of the future will be for those who are in the early stages of their educational careers right now. We have put together a list of the 10 most popular jobs for the future in this post.

### 1. **Personal Financial Advisors**

Financial advisors work with individuals and married couples when it comes to planning their finances, their taxes and their insurance. They help their clients make decisions and invest properly in their future. According to the Bureau of Labor Statistics, this position is expected to grow by 32 percent from 2010 to 2020. The BLS is attributing the large growth within the industry to the large number of baby boomers beginning to retire. They will want help in planning their finances for their retirement.

### 2. **Actuaries**

Actuaries have a relatively uninteresting job. They analyze the financial costs of risk for banks, firms, government agencies and other entities using advanced statistics and math. The BLS reports that this industry will experience 27 percent growth between the years of 2010 to 2020. Actuaries find most of their work with insurance companies.

### 3. **Registered Nurses**

Registered nurses are responsible for caring directly for their patients in hospitals, doctor offices and when issuing home care. The BLS has said that this profession will grow by a rate of 26 percent from 2010 to 2020. In an effort to attract and retain nurses within the industry, employers are considering offering flexible work schedules, signing bonuses and other lucrative benefits.

### 4. **Management Analysts**

These professionals help managers at companies and firms make their decisions. They also help managers find ways to make their departments or companies more profitable. The BLS reports that this profession will grow by 22 percent from 2010 to 2020.

### 5. **Auditors and Accountants**

Accountants are used today by almost every company in an effort to manage their finances and record-keeping processes. This profession is expected to grow by 16 percent from 2010 to 2020, according to the BLS.

### 6. **Computer Applications Software Engineers**

Mobile applications are becoming more and more popular these days, which is why software engineers are in such high demand across the business world. This profession is expected to experience a growth of 28 percent from 2010 to 2020, according to data from the BLS.

### 7. **Computer Systems Analysts**

These professionals help companies operate as efficiently as possible and manage the computer networks within the organization. This profession should experience growth of 22 percent from 2010 to 2020, according to the BLS.

### 8. **Surgeons and Physicians**

The medical industry has been expanding exponentially of late and these two types of doctors are expected to increase by 24 percent from 2010 to 2020, according to BLS reports.

### 9. **Civil Engineers**

The infrastructure of the country is due for a makeover, or some rebuilding, which is why this profession continues to explode. The BLS reports that this profession will experience growth of 19 percent from 2010 to 2020.

### 10. **Market Research Analysts**

These professionals help companies reach their customers on a continual basis. This profession will experience 41 percent growth from 2010 to 2020, according to the BLS.
