INTERNATIONAL ASSOCIATION FOR HUMAN RESOURCES INFORMATION MANAGEMENT TO HOST ANNUAL CONFERENCE

The International Association for Human Resources Information Management (IHRIM) has announced the dates for their annual Conference and Technology Exposition.

The event, which congregates leaders in the Human Resources Information Management community along with business leaders, will act as a forum for the exchange of ideas and practices, in order to increase innovation and build and fortify relationships among the community. Lynne Mealy, the CEO of IHRIM, gave this statement in a press release for the event: "In these times of economic hardship, this year's Conference and Technology Exposition is more important than ever. The IHRIM 2011 Conference and Technology Exposition is a must-attend even – especially as companies proceed in 2011 with cautious optimism and start to look at how HR systems can support their overall business strategy. This is why the conference is making it essential to provide the information and tools companies ned to maintain workplace quality, increase productivity and avoid wasteful spending." Speakers who will appear at the conference include HR leaders at Dell, Oracle, the Chicago Cubs, Johnson Controls, Sony Music Entertainment, the Mayo Clinic and Alegent Health. Topics that will be discussed include: workforce analystics, software as a service (SaaS), social media, user security, system administration, and HRIS staffing analysis just to name some.
