
MOBILE DEVICES MEAN INCREASED WORK FOR EMPLOYEES OUTSIDE OF OFFICE HOURS

According to a new report, 38 percent of employees equipped with mobile devices such as smartphones and laptops work before their commute, 25 percent work during their commute, 37 percent work during lunch, 33 percent work after their commute home and 26 percent work after dinner—every day. Overwhelmingly, mobile workers reported that work shifting allows them to be more productive and efficient, with 79 percent reporting increased productivity and 78 percent reporting increased efficiency.
