## ROYAL TECHNOLOGIES TO BUILD PLANT, CREATE 400 JOBS

A new automotive manufacturing facility coming to Cullman, Alabama will create up to 400 jobs, and include a \$30 million investment within five years. Royal Technologies produces automotive interior trim. It is purchasing 26.6 acres in a Cullman industrial park for a plastic injection molding, assembly, decorating and foam molding operation. Royal Technology employs about 800 at four different facilities in Michigan. This will be the company's first facility outside of Michigan. Royal Technology will expand the new Cullman operation in phases, with phase one being a manufacturing plant and office space of approximately 125,000 square feet. The 26.6 acres will allow it to potentially expand the operation to up to 400,000 square feet.
