

SMITH ELECTRIC VEHICLES TO CREATE 200 MISSOURI JOBS

Smith Electric Vehicles US will announce tomorrow the construction of an assembly plant in Kansas City, Missouri. The US-British consortium expects to employ 200 people manufacturing all-electric powered delivery vans. The assembly plant and support operations are expected to occupy existing buildings for now. The average starting wage will be \$44,236 annually, and the facility will employ 200 full-time workers within three years.
