## FLORIDA COUNTY MAY CUT 40 SCHOOL JOBS

The Lake County, Florida school district may eliminate 40 district-level positions to save about \$2 million next school year. Recently the School Board downgraded several district administrators' titles and cut salaries to save \$18,000. The School Board will vote later on whether to slash the 40 positions, only seven of which are vacant. Eliminating the seven vacant positions would save more than \$215,000. Terminations will be based partly on seniority.
