## ALABAMA BILL COULD LURE 7,000 JOBS TO COTTON STATE

The Alabama Development Office supports a bill that could bring 7,000 white-collar jobs to the state. If the Alabama State Senate passes the bill, it would extend existing economic incentives for manufacturing to corporate headquarters, research & development facilities and green employers. It would also increase the base wage requirement to \$15 per hour, or the average wage of the county. The Senate is set to vote on the bill before Friday.
