## COMAIR CLOSING FLORIDA MAINTENANCE HUB, LAYING OFF 81

Erlanger, Kentucky's Comair, a wholly-owned subsidiary of Delta Air Lines, is shuttering a maintenance base at Orlando International Airport in Florida in September. Eighty-one jobs will be lost. Some employees may be bumped to other positions within Comair. Comair is one of the world's largest regional airlines and, with over \$1 billion in annual revenue, would be considered a major airline carrier except for the fact that its aircraft seat less than 100 people. It flies to 70 cities in the US and Canada.
