
NANOSPERSER TO GROW, ADD JOBS IN OHIO

Nanotechnology firm NanoSpense has launched in Kettering, Ohio, and intends to add high tech jobs. The firm creates nano products that improve existing materials, for instance by preventing erosion. The applications include military and aerospace products. NanoSpense received \$4 million in federal funds for start-up costs. It currently employs seven people, but will expand soon. Kettering's NanoSpense is a design and manufacturing company dedicated to improving durability, reliability and functionality of defense, aerospace, and industrial composites. NanoSpense's specialization is uniform dispersion of nanomaterials used as feedstocks for advanced composites.
