

PENNSYLVANIA-BASED IT COMPANY EXPANDS: 30 HIGH-SALARY POSITIONS

Bloomsburg, Pennsylvania-based OPTiMO Information Technology is creating 30 high-income jobs through the opening of a new 5,000 square foot office. "We feel there's a great opportunity for a full-service technology firm to come into the city," said CEO Mike Miguelez. "We feel there are a lot of businesses that need our services and there's a lack of a major company that could provide these resources. Traditionally, businesses had to go out to bigger cities and get bigger firms to help them with their IT needs. We're able to provide those same solutions locally." OPTiMO is purchasing new equipment and preparing to provide training for the new employees. Their services include staffing, information assurance, and digital forensics.
