
DENSO AIR BRINGING 80 JOBS TO KENTUCKY

Japan's Denso Air Systems, a global manufacturer of automotive parts, is building a manufacturing plant in Hopkinsville Kentucky that will create 80 jobs initially and another 25 over the following few years. The plant is expected to be operational by this middle of this summer and will manufacture pipes, tubes and hoses for automotive manufacturing. The company is investing \$4.2 million into the new plant and has been preliminarily approved to receive tax breaks from The Kentucky Economic Development Finance Authority.
