
GENERAL ELECTRIC HIRING 2 PER DAY AT MICHIGAN CENTER

General Electric is now hiring at its new Advanced Manufacturing and Software Technology Center in Van Buren Township, Michigan. Currently, the center is hiring, on average, two new technical workers each day. The Center expects that it will have 1,100 employees by the year. The company also says that the Memphis location will contain the highest concentration of GE IT experts in the entire world. The new employees will help in the development of new software, as well as processes and technologies that will aid GE's manufacturing units, according to Managing Director, Vic Bhagan.
