
CREATION OF GREEN JOBS IN SOLAR AND WIND INDUSTRIES

In an overall grim economic scenario, creation of green jobs in solar and wind industries surely provides a ray of hope; availability of federal subsidies and tax credits is largely at the base of this positive trend. However, the impending likelihood of slashing these subsidies/credits by the Congress, albeit as a desperate move, will surely restrict one of the very few areas of job creation. Read the full article here: [Washington's green jobs killing act](#)
