

SHELL TO BUILD LNG PLANTS IN U.S., CANADA FOR TRANSPORT FUEL

The article is about the Shell to build LNG plants in U.S., Canada for transport fuel. Shell and its affiliates plan to bring liquefied natural gas (LNG) fuel one step closer for its marine and heavy-duty on-road customers in North America by taking a final investment decision on two small-scale liquefaction units. Natural gas is an abundant and cleaner-burning energy source in North America, and Shell is leveraging its LNG expertise and integrated strength to make LNG a viable fuel option for the commercial market, said by Marvin Odum, President, Shell Oil Company.
