## OIL RISES TO \$98, AHEAD OF FED MEETING

“INSTANT NEWS FLASH!” Amazing and outstanding economic results from Federal Reserve meeting: Yes, that's right, a news leaked to Internet News Agencies has just revealed that Crude Oil is going to peak at around 98 dollars a barrel. Naturally, there is concern as the recent war and unrest overseas may well drive prices even higher and what's worse, there are fears that rising oil prices could drive bond prices higher and the Federal Reserve's attempt to keep bond prices under control might even fail. But the real and 'Untold Story' and it's dramatic outcome can be seen at Yahoo News. For more details on the article [Click Here](#)
