

A 20-YEAR LOW IN MAY FOR EUROPEAN CAR SALES

The article is about the European car sales dipping down in the month of May. The decrease in the sales for the month of May is said to be the worst in 20 years. Unemployment and shrink of economy is said to be the factors that affected the sale. Recession is playing a major role in putting the car makers in deep trouble. There is also a prediction that sales would go down further in the coming months. For more details on the article [Click Here](#)
