

REPORT HOLDS RENEWABLE ENERGY COULD CREATE UP TO 37 MILLION NEW JOBS BY 2030

According to a report put out by the [American Solar Energy Society](#) and [Management Information Services](#), renewable energy and efficiency industries employed more than 9 million people in the U.S. during 2007, generating over a trillion dollars in revenue.

The report held several key findings: - 95% of the jobs in the renewable energy sector were in private industry. - The sector has the potential to add up to 37 million jobs by 2030. - The largest growths in revenue belong to solar thermal, solar photovoltaics, biofuels, and fuel cells. - The renewable energy sector grew more than three times as fast as the US economy in 2007. The study also predicted that the revenue for renewable energy could surpass 4 trillion in annual revenue by 2030. Find jobs in the green sector, and every other sector at [Employment Crossing](#).
