## PEX TUBING

Tubing is a flexible hose or pipe used in plumbing, irrigation, and other industries. Tubing may be made of polyvinyl chloride (PVC), polyethylene (PE), copper, or other material. Tubing is usually supplied in rolls compared to rigid pipe which is sold in straight lengths called joints or sticks. Tubing is usually measured by its outside diameter, while pipe is usually measured by its inside diameter.

PEX Tubing is used to distribute water in PEX Plumbing, Radiant Heat, and other Hydronic Heating Systems. When using PEX Tubing for heating purposes, Oxygen Barrier PEX such as ThermaPEX, Wirsbo hePEX, Mr. PEX-al-PEX, and Multicor PEX-al-PEX Tubing should be used.

PexSupply.com offers high quality products from the best manufacturers in the industry. Manufacturers such as Wirsbo, Taco, Watts, Bell Gossett, Honeywell, and McDonnell Miller set the highest standards in the plumbing and heating industry. PexSupply.com provides the customer with all the information needed to make the right product purchase.
