## ONLINE SURVEY REVIEW

One of the easiest ways to make some extra cash for people like, stay at home moms, and students like myself is to get started taking online surveys. There's nothing like getting paid to give your opinion; I love it! There are also a few related home business opportunities such as Mystery Shopping, and Online Data Entry jobs.

In my own research I have found that there are literally thousands of websites promoting what they claim to be the best online survey sites. Many of the sites will claim that you should never pay to gain access to the survey companies but should instead always go to the free databases which they will gladly give you access to as long as you give them your name and web address so they can sell you something else later.

What is the average person looking to make some extra cash with the least amount of complications to do? Well I'm glad you asked!

Let's start by laying some groundwork. Don't let anyone tell you how to make money online. It is OK to get opinions and ideas from other people but always do your own due diligence. It is imperative that you check out the opportunity, no matter what it is, before you jump in with both feet and end up drowning in a flood of complicated nonsense that will waste both your time and money and won't make you a dime. If you haven't guessed by now, I am speaking from personal experience.

Now let's talk basics; online surveys are a great opportunity to make extra money but not something that will make you an instant millionaire! Need to cover this month's car payment? No problem. How about the mortgage payment? We can swing it! Of course it will depend on how much time and effort you put into filling out and submitting the surveys as you must build a track record in order to be offered some of the higher paying surveys.

The next thing we want to consider is which online survey company should we sign up with. You have two choices, a free site or a paid site. I think you should check both of them out before you make your decision but my own personal preference is to go with a reputable paid survey site where you pay a small one time fee of usually \$30.00 to \$40.00 to gain access to a prescreened database of solid survey companies that will pay you to give your opinion on online surveys and opinion polls.

If you choose a good site it will also have related opportunities as listed above for Mystery Shopping and Data Entry jobs. The great thing about the paid sites is they offer customer support; tips to help you get started with your online survey business, and free bonuses that are worth several times the price of admission. The site that I will be reviewing in the next paragraph also has a way for you to make most of your membership fee back in about 15 minutes!

### Review of Paid Surveys Online

Paid Surveys Online is one of the original paid survey sites and still ranks as one of the top sites in sales. This is an indication that a lot of people find their service useful.

They tend to focus on listing the better quality research companies in their databases and recently have increased the volume of companies to over 70.

Paid Surveys Online generally select research companies that are proven to be reliable with payments; very important to anyone who does not want to waste their valuable time to get paid out with only gift certificates.

Paid Surveys Online is good about providing companies that offer survey respondents a fair amount of compensation for the amount of time and effort required for each paid survey.

Paid Surveys Online offers many free bonuses not provided by the others such as an instant \$25.00 survey. Customer support is excellent and there is also a lot of useful information and help to be found on the Paid Surveys Online site. This is without a doubt one of the top paid survey sites.

In conclusion the important thing here is to make sure you do your homework and check out as many online survey sites as you possibly can before making your decision. Take your time in choosing but please don't get paralysis of analysis :-> there are some legitimate survey companies out there and it will be one of the easiest ways you can imagine to make some extra spending cash.
