

UNLIMITED TRAFFIC AND BACKLINKS!

Visitor Frenzy

This software sends HTTP requests to websites with your URL as Referer, so the webmaster thinks someone got on his website through a link on your website!

How this method is going to get you traffic

-Webmasters will see your link at their traffic stats page and will check out your website to see where their link is placed (which isn't placed, so they might check back a few times!)

-A lot of websites show 'Last referers' on their website, so it generates backlinks also!

A list of 5,000 URLs which show 'Last referers' on their website is included in the package to start you off!

Unlimited traffic & backlinks!
