## A DEFRAZZLED HOME BUSINESS

"I've got all the money I'll ever need if I die by four o'clock this afternoon."

- Henry Youngman.

**You can retire in 30 days – WE PROVE IT TO YOU! Make \$1.7 million! Signup for free! \$5,250 is Guaranteed with no efforts!**

The Internet is the modern "Gold Rush". Seems that everyone on the Internet is promising you vast riches with little to no effort. But are these outrageous claims true? Can you make \$5,250 is Guaranteed with no efforts?

Well, I do believe the Internet is a phenomenal asset to those who want to make some money with less effort and financial investment than with a traditional home business. Can you lounge around all day in your underwear doing nothing and be a millionaire by the end of the year? Not likely. However, if you did want to try your hand at a successful Internet career, take some tips from someone who's been there, done that, and has the scars to prove it. Here's my hard-won, 5-step-plan for financial success on the Internet.

### **Step one: Find Some Adventurous, Business-Minded Soul Mates.**

Get at least two companions (five is best!) who will walk with you enthusiastically, and build your business together. Having a couple of friends with you on the journey helps to keep everyone sane, and it's a built in safety net for keeping you from investing in crazy schemes that would never tempt you during a moment of sanity. Friends can also cheer you on through the necessary slogging at the beginning, and then they're there to celebrate your success at the end.

### **Step Two: Create Your "Cash Machine"**

There's an old adage that says, "It takes money to make money" and, unfortunately, it's true – mostly. Therefore, according to Loral Langemeier, the Author of the excellent book "Making Millionaires" – first you have to learn how to run a business that makes money. You don't have to enjoy it, but it does have to make money – even just a little, and fast! You use this first step to teach you how an Internet business works and to develop the right suite of tools and knowledge to gain a solid foundation.

### **Step Three: Build Multiple Streams of Income**

When your first business is up and running, don't simply burn through the money. Use half of the profits to advertise, and half of your profits to invest in the next business(es). Keep building until you have a solid core of different businesses running under you. This brings stability. If you're wise, you will also be carefully investing in businesses that will give you great tools for running and advertising your businesses, as well as investing in courses that train you in the various areas of online marketing: traffic, copywriting, list building, etc. You must learn to use your profits wisely as even stable companies can sometimes go under.

### **Step Four: Automate it.**

It is possible to run a completely functional business on 2-3 hours a day – or less – by simply automating the more routine activities. Again, there's nothing like the Internet for providing automated systems.

### **Step Five: Develop Your Passion**

So now you've got some real money coming in with an automated system. You can either stay there, or you can take your new knowledge and learn to apply it to your area of greatest passion – creating a business that you LOVE. Simply find a need in an area of your passion (scrapbooking, fly fishing, old cars, fashion, etc.) and use the skills you've developed so far to set up a business in that area and let it take you on a wonderful ride!

So, can you make \$1.7 million dollars? Yes, you can, but it's not going to be as easy as they tend to promise. You do need to know what you're doing, and it will take time.

And what better time to try it out than over the summer when things tend to be a bit slower?

Want to join the adventure?
