
DELTA SET TO CUT MORE JOBS

Delta is set to cut 200 management and administrative jobs. This move comes after Delta offered voluntary retirements and buyouts to its employees earlier this year, which got 2000 takers. But this move didn't reduce the operating expenses of the company. Major share of the layoffs will be from Atlanta headquarters. The let go workers will still get severance pay and other benefits similar to those who took buyouts. The layoffs will not include counter agents, gate agents and other frontline workers.
