HOW YOU PROFIT AND DOUBLE YOUR PENNY STOCK WITH "DOUBLING STOCKS"!

Penny Stocks are stocks less than $5. They are generally greatly volatile, with potential huge gains or huge losses. However, it is likely for anyone to generate profits in penny stocks when he or she becomes a subscriber of Doubling Stocks.

What is Doubling Stocks? It is a newsletter created by penny stock guru, Michael Cohen. The Doubling Stocks system can be structured into 3 parts:

Step 1: On Sunday dusk, check your email to read the Doubling Stocks. The newsletter will grant subscriber 1 profitable penny stock pick weekly.

Step 2: Wake up Monday morning and select the trade online or with your broker through the phone.

Step 3: Go about your everyday work and check back repeatedly to see how the stock is performing. In most cases, you will have effortlessly earned double or even triple your cash back!

This is made possible since the weekly penny stock picks are recommended by The Universe's First Trading Robot named " Marl ". Marl was developed by Michael and renowed fund manager, Carl Jenkins.

Marl works by analysing each stock's former price movements to predict the stocks potential direction (technical analysis). The typical professional stock trader can identify solo stock chart around every 8 - 10 seconds when looking for an opportunity. That is too slow for Marl. Marl can easily watch hundreds of stocks at the same time, allowing it to be greatly selective, waiting until all the correct criteria line up before making a trade recommendation.

Ever since the Doubling Stocks newsletter was started this year, Marl has predicted stocks that made an average of 105. 28 % growth mainly within several hours of the market opening! Below are some examples:

1. CLEAN POWER TECHNOLG (CPWE. OB) $0. 71 (February 2007) $1. 88 (February 2007) + 164 %

2. Optionable Inc. (OPBL. OB) $8. 89 (February 2007) $5. 02 (March 2007) - 43 %

3. Regal One Corp. (RONE. OB) $0. 07 (March 2007) $0. 19 (March 2007) + 171 %

4. Transbotics Corp. (TNSB. OB) $0. 47 (March 2007) $0. 68 (April 2007) + 44 %

5. PAETEC Holding Corp. (PAET) $9. 80 (March 2007) $19. 25 (March 2007) + 96 %

6. BioStem Inc. (BTEM. OB) $0. 46 (March 2007) $2. 34 (March 2007) + 408 %

7. Bravo! Foods International Corp. (BRVO. OB) $0. 15 (April 2007) $0. 28 (April 2007) + 86 %

So ready to test out Marl's stock pick? Access Doubling Stocks here.

A more recent pick by Marl is Andros Isle Development (AVPJ. PK), a real estate development firm principally operating in the Caribbean Basin. Michael sent an email on the 3rd of September asking his Doubling Stocks subscribers to invest when it was trading at $0. 13. On the 4th of September, the stock rocketed to a high of $1. 01 at one point.

From a personal point of view, I have joined Doubling Stocks for 3 months. I have traded 12 recommended stocks. 10 were winning trades with only 2 losses. I always make it a point to do some research after receiving Michael's penny stock pick on Sunday. I must say that the stock picks are always spot on.

It cost just one time fee of $47 to subscribe to the Doubling Stocks Newsletter. Most of the subscribers like me make much much more than the $47 with our first penny stock pick from Marl. In fact, new members have a risk free 8 weeks period to try the Doubling Stocks Newsletter. Michael promises to give you a full refund if you do not make any profit.

In addition, Doubling Stocks subscribers will get an ebook called " The Penny Stock Bible " that shows you how to identify profitable trends in penny stocks. If you are a complete beginner, the ebook also shows you how to open an account with the recommended online brokerage firms.

I recommend Doubling Stocks. If you are willing to even take a little bit of risk, you will be quite satisfied with the amount of money your own money can make you through Penny Stock. It is so easy to do because Michael Cohen does all the legwork for you and you just have to sit back and watch your investment grow.
