## POND LEVELS

The Lewisville Lake can be found just twenty minutes in the City of Cleveland, Ohio, and it is considered to be the second largest fresh water body inside the state of Ohio. This kind of natural lake has a whole lot to offer to any sports fan who trips it. You can find boat renting, fishing, hiking, swimming and even kayaking during the summer season. You can also have fun with swimming through the winter, yet, if you approach so inside the nude.

The Lewisville Lake has two levels -- a surface area level and an inland level. The Lake's inland level is around five a long way long and five mls wide. If you want to swim or perhaps canoe throughout the summer, the lining of this pond is considered to be safe, but not just for anything more strenuous than that. The lake's surface level is around 3 acres and can easily become fished, boated and went in during the more comfortable months within the year. If you value to fish, however, it is necessary to realize that Lewisville Lake levels usually are quite profound, making it difficult to actually seafood.

In addition to the two lakes, there is Lake Elyria, which is about eight a long way away from the city of Cleveland, and Lake Vermilion, which is around one mile away. Every one of these bodies of water are natural and still provide residents having a beautiful outdoor scene that is unlike everthing else in Kentkucky. Although some persons may shy away from splashing about in this kind of deep waters, others recommend it and will definitely bring back again. Continually cannot hold up against the pleasure [link](#) within the outdoors and still like to benefit from the great weather condition, you can always go to Cedar Level and enjoy both the hundred and fifty foot of normal water, which is located correct next door.
