

GET AN EASY MERCHANT ACCOUNT

Get an easy merchant account when you apply at one of the hundreds of online application centers that await you. A merchant account lets you expand your customer services to accept credit card payments in a number of easy ways. Your clients will love the convenience of shopping on credit instead of hustling to produce cash or write a check at the checkout line. And you will love the convenience of instant payments instead of waiting days or weeks for a check to clear or a monthly statement to be paid.

You can find an easy merchant account lender by using the phrase in a search engine of your choice. When the list of links pops up, start browsing to find those that you are familiar with or want to learn more about. Click through each lender's Website to locate terms, fees, and services rather than assuming that all are the same. You will soon notice that each lender has its own price list and terms, so get a good sampling before making a decision to go with one of them for your merchant account.

Easy merchant account terms should be spelled out clearly at each Website. If you do not understand exactly what is expected, or if some of the language seems vague, get in touch with a customer service representative to ask questions. It is better to find out in advance what you will be expected to do and to pay before signing a contract that could end up jeopardizing your business. Obviously you will want to get the lowest rates and the best terms. For example, you may have to choose between paying so much per transaction (often a quarter or less) or paying a low interest percentage each month, which may require certain minims, as well.

Try to locate a lender that you can trust for your easy merchant account, one that has been in the business for some time. Perhaps you've seen news stories or read business articles that have told you something about this company in the past. You can check archived press stories as well to get a feel for the legitimacy and dependability of a particular lender. If you cannot find helpful information, ask the Better Business Bureau or check with other businesses around town or in financial chat rooms to get the scoop.

Your easy merchant account, when approved, will let you accept credit card payments from customers in a number of ways. You can set up a telephone ordering and payment system, for example, that is completely automated and does not require human services support except for a part-time customer services representative who can answer questions. Or you might want to get a wireless credit card processor that you can take along with you when you deliver goods or services, and thus process payments immediately. Another option is to put in a processor at your shop or store so customers can pay with a credit card instead of just by cash or check. And a company Website with credit card processing capabilities can draw clients from many nations. Your underwriter can provide necessary support for converting currencies and processing offshore payments, often for one low monthly fee. Shop today for your easy merchant account.
