

MEDIA DECODER BLOG: DIGITAL NOTES: AMAZON 'RIPS' CDS INTO THE CLOUD

Now, the cloud is a vital cornerstone of our technology, especially the advancements in our mobile and tablet technology proves it. After the launching of Cloud Player, which offers the most complete cloud music service fastest to the millions of customers and help them to back up their digital music files and stream them on any device, Amazon introduced an enhancement to Cloud Player called ?AutoRip?. The new service can shoulder everything customers have bought on CD, to use to the maximum back all the way to 1998.
