

## **BULLIED STAFFERS MORE LIKELY TO REQUIRE ANTIDEPRESSANTS, SLEEPING PILLS**

workplace bullying can sometimes get you towards medication according to a survey. The researchcheers claimed that those who are bullied are more likely to use sleeping pills, antidepressants and sedatives. Usually, most of the bullied people are bullied by their managers, according to a survey. People who have power, mostly use their powers in a negative way. This research have been supported by the researchers of the USC Marshall School of Business and the Stanford Graduate School of Business.
