
FINDING A GOOD SUMMER INTERNSHIP

Academic Internship

This would be a great way to go if you're in college and want to learn the application area of what you're learning at school. Academic internships will especially benefit those who want to go for a master's degree in their preferred subject. The internship is usually a research based one and sometimes even industries fund the research.

Other Summer Internships

- **Law:** This increasingly, is becoming an area where there is a need for the brightest and the most practical brains on earth. People are increasingly exposed to all kinds of affairs and that leads to a complex quagmire – which has to be settled with the help of lawyers. Students who are studying law can take up internships with leading law houses and even work as a law consultant – in case you have the requisite knowledge.
- **Technology:** If there is anything that has multiplied by leaps and bounds since the appearance of the first ape-man, which is technology. There is technology in every field and more people by the day are realizing the need and the gravity of being in a technically sound world. Science along with technology has given us many good things to harp upon. You can choose from the following areas for a great technology-based internship.
 - Computers and information Technology
 - Mechanical, Civil and other construction based technology
 - Food Technology and allied areas such as catering and nutrition
 - Electronics and Electrical technology
 - Communication technology
- **Arts:** There is hardly anyone who is not in awe of a celebrity. Youngsters are increasingly being inclined to music and there are artists who are painting wonderful pictures. Finding an internship of the mentioned area is nothing difficult; more because the experienced want to test the creativity of the budding talent pool.
- **Sports:** Want to master the free-kick of your favorite footballers? Then you can even try sports internships. If you're a player of class, it won't be long before you can play for your favorite team. There are summer internship employment opportunities in the same field as sports doctors, trainers, meditation specialists, etc.
- **Science:** How can we not consider the basic sciences? There are attractive internship opportunities available in the research areas of basic sciences. Use your knowledge of physics, chemistry, mathematics and biology to discover new avenues in the same. There are other various summer employment opportunities. The main pre-requisite is that you have to be on the lookout for the best summer jobs.
