

UNION: EXPECT MORE SHORT-TERM CATERPILLAR LAYOFFS

This article tells about the Union: Expect more short-term Caterpillar layoffs. Many animals feed on caterpillars as they are rich in protein. As a result caterpillars have evolved various means of defense. The appearance of a caterpillar can often repel a predator: its markings and certain body parts can make it seem poisonous, or bigger in size and thus threatening, or non-edible. Some types of caterpillars are indeed poisonous. Read the full article here: [Union: Expect more short-term Caterpillar layoffs](#) Want to see which jobs are available near you?
